The Engineering Health Lab at KITE Research Institute is conducting a research survey study on mobility device loss and damage during air travel.

If you experienced loss or damage to your mobility device while flying in or out of a Canadian airport, you could be eligible to complete the survey. Taking part in this research study survey is voluntary.

For more information and to access the survey, go to:

[**engineeringhealth.ca/accessible-air-travel/**](https://engineeringhealth.ca/accessible-air-travel/)

For questions about this research study, please contact the Engineering Health Lab directly through the website above.

Do not to post anything sensitive about yourself. If you are interested in participating in the study, do not reply to the post as the reply would be public.

[Image description: Image is a digital drawing of a woman in a wheelchair being pushed by a man through an airport terminal. In the background we can see out a large window to a view of the airport tower and an airplane taking off above a city skyline.]
